TABLE 5.1 MODEL FOR DEVELOPING VOLLEYBALL THROUGH SMALL-SIDED GAMES

Game Format	Fundamentals	Skills	Tactics
Lead-up games Ball over the net	Ball flight judgement Control of space	Moving Catch and throw Catch and throw with two hands	Defensive base Attack into space
1 v 1	Ready posture Beat the ball	Volley pass	Attack from close to the net
2 v 2	Linking with team-mate (playing off the ball) Creating space for team mate Controlling the space between two players	Volley pass through an angle	Three touches to build an attack Covering court (receiving serve and defending attack)
3 v 3	Movement forwards, sideways and backwards Reading opponent's attack	Forearm pass Underarm serve Attack with jump – volley or smash Block	Service reception formation (designated setter) Defence with or without block Cover of attacker
4 v 4	 (Advanced players only)	Reverse volley/set • Two person block • Overarm serve • Emergency defensive skills • Front and back court players	Width in attack Deception in attack Cover against tip attack
6 v 6		Development and refinement of all skills	Service reception, e.g. W + 1 Attack system, e.g. setter at 3 Attack cover, e.g. 1-3-2 Defence system, e.g. 2-1-3

A brief history of volleyball

In 1895 William G. Morgan from the USA invented the game, originally known as "Mintonette," which has developed into one of the most all round athletic, entertaining and challenging team sports.

Olympic Games

For the first time volleyball is officially included in the programme for the **1964 Summer Olympic Games**.

Hands over net

The player's hands are allowed to **pass over the net during blocking action**.

Three hits

A new rule limits the regular ball contacts to **three hits per side**.

Six-a-side

The **set-up changes to six-a-side**. Formerly each team was made up of five players.

Blocks & net width

A **block doesn't count as a hit** anymore. After the block there are still three hits permitted.

The **width of the net is reduced** to nine metres.

1976

1994

1998

Touch & service

The ball can **touch any part of the body** including the feet.

The **service zone is extended** to anywhere behind the end line.

Scoring, libero & more

The newly introduced **Rally Point System** and the **libero** player increase the appeal and suspense of the whole game. Further innovations include **coloured balls** and the allowance of **interactive coaches**.

An overview of volleyball

Save the ball from touching your court and return it forcing a fault by your opponent – all with three hits maximum.

Scoring system

A match win = 3 sets
25 points are available per set
(15 in 5th set)
Minimum lead of 2 points needed
Maximum of 2 time outs
allowed per set

Height of net:
♂ 2,43 m ♀ 2,24 m

Ball

The ball is made of a leather or vulcanised synthetic case with a rubber-like bladder inside.

Circumference	65 – 67 cm
Weight	260 – 280 g
Inside pressure	0.300 – 0.325 kg ²

Set-up

Up to 12 players per team
(6 on court, 6 substitutes
incl. up to 2 liberos)
- 3 technical staff
(coach/assistant coach/trainer)
- 2 medical staff
(doctor/physiotherapist)

Officials

- 2 referees
- 4 line judges

Front row

The area where blocks and the majority of attacking spikes take place.

Rotation

Whenever a team has gained the right to serve, its players rotate one position clock-wise. As soon as the ball is in play, all players can freely choose their positions on the court.
